KEY RELATIONSHIP DRILL

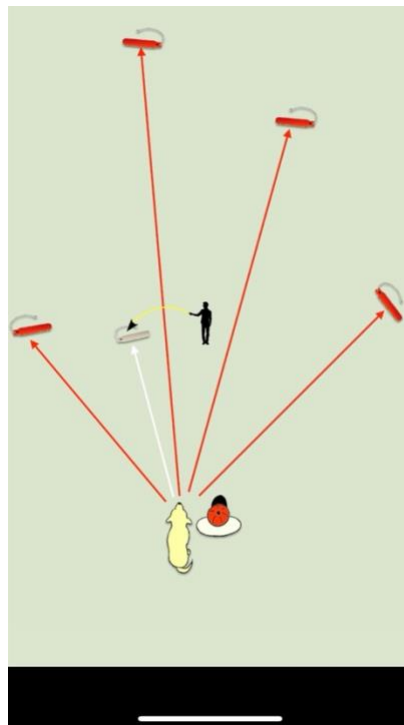

Borrowed from RETRIEVERS App

Purpose - to teach a dog the key relationships between marks and lines to a blind. They are; tight behind a gunner, wide behind a gunner, under the arch, and past or through an old fall. The KRD is also a maintenance drill.

Setup - A stationary gunner throws a mark to the same place for the entire drill. 4 blinds are laid out to illustrate the key relationships. The 2 inside blinds are 'tight behind the gunner' and 'under the arch'. The 2 outside blinds are 'wide behind a gunner' and 'past an old fall'.

Strategy - The mark is thrown, the dog is sent, and the dog is received. Then the dog is sent for a blind.

When the dog can consistently line the blinds, the order of the throw can be varied, the setup can be moved to terrain with more factors; distance, wind, terrain, etc.

Preserving Working Retrievers Since 1935

The MGDA was originally formed in 1935 by a group of hunters and sportsmen with an interest in training retrievers for waterfowl hunting and competition. Incorporated in 1972, the Manitoba Gun Dog Association Inc. has played an important role in Canadian working retriever history. Today the MGDA has approximately 75 members. The Club hosts two Canadian Kennel Club licensed Field Trials and two CKC licensed Hunt Tests annually. In addition, the club provides a number of informal Picnic Trials and Retriever Workshops each year.
